|  | <ul style="list-style-type: none"> <li>• <b>Co-payments (copays)</b> are fixed dollar amounts (for example, \$15) you pay for covered health care, usually when you receive the service.</li> <li>• <b>Co-insurance (co-ins)</b> is <i>your</i> share of the costs of a covered service, calculated as a percent of the <b>allowed amount</b> for the service. For example, if the plan's <b>allowed amount</b> for an overnight hospital stay is \$1,000, your <b>co-insurance</b> payment of 20% would be \$200. This may change if you haven't met your <b>deductible</b>.</li> <li>• The amount the plan pays for covered services is based on the <b>allowed amount</b>. ## Questions and answers about Coverage Examples:

<p><b>What are some of the assumptions behind the Coverage Examples?</b></p> <ul style="list-style-type: none"> <li>• Costs don't include <b>premiums</b>.</li> <li>• Sample care costs are based on national averages supplied to the U.S. Department of Health and Human Services, and aren't specific to a particular geographic area or health plan.</li> <li>• The patient's condition was not an excluded or preexisting condition.</li> <li>• All services and treatments started and ended in the same coverage period.</li> <li>• There are no other medical expenses for any member covered under this plan.</li> <li>• Out-of-pocket expenses are based only on treating the condition in the example.</li> <li>• The patient received all care from in-participating <b>providers</b>. If the patient had received care from out-of-participating <b>providers</b>, costs would have been higher.</li> </ul>	<p><b>What does a Coverage Example show?</b></p> <p>For each treatment situation, the Coverage Example helps you see how <b>deductibles</b>, <b>co-payments</b>, and <b>co-insurance</b> can add up. It also helps you see what expenses might be left up to you to pay because the service or treatment isn't covered or payment is limited.</p>	<p><b>Can I use Coverage Examples to compare plans?</b></p> <p>✓ <b>Yes</b>. When you look at the Summary of Benefits and Coverage for other plans, you'll find the same Coverage Examples. When you compare plans, check the "Patient Pays" box in each example. The smaller that number, the more coverage the plan provides</p>
	<p><b>Does the Coverage Example predict my own care needs?</b></p> <p>✗ <b>No</b>. Treatments shown are just examples. The care you would receive for this condition could be different based on your doctor's advice, your age, how serious your condition is, and many other factors.</p>	<p><b>Are there other costs I should consider when comparing plans?</b></p> <p>✓ <b>Yes</b>. An important cost is the <b>premium</b> you pay. Generally, the lower your <b>premium</b>, the more you'll pay in out-of-pocket costs, such as <b>co-payments</b>, <b>deductibles</b>, and <b>co-insurance</b>. You should also consider contributions to accounts such as health savings accounts (HSAs), flexible spending arrangements (FSAs) or health reimbursement accounts (HRAs) that help you pay out-of-pocket expenses.</p>
	<p><b>Does the Coverage Example predict my future expenses?</b></p> <p>✗ <b>No</b>. Coverage Examples are <b>not</b> cost estimators. You can't use the examples to estimate costs for an actual condition. They are for comparative purposes only. Your own costs will be different depending on the care you receive, the prices your <b>providers</b> charge, and the reimbursement your health plan allows.</p>
